

Example Progress Report Layout

(Your Construction Site)

Hampshire

4th April 2026

View 1 - Site Overview

This report provides a visual overview of site progress, captured from consistent aerial viewpoints to support clear project updates.

View 2 – Alternate Site Overview

General site layout and access routes visible.

View 3 – Structural Progress

Material storage visible to the right, with active access routes across the site.

Structural works progressing along centre.

View 4 - Groundworks Overview

Clear access routes and visible progress in multiple zones.

View 5 – Building 1 Groundworks

Groundworks progress visible for building 1.

Water logging can be seen in dug channel, with distributed materials in the centre.

Progress Summary 04/26

- Groundworks completed across multiple areas
- Structural progress visible across key buildings
- Increased site activity and material presence
- Ongoing development across multiple build zones
- Waterlogging observed in Building 1 groundworks

Notes

- This document is an example layout for demonstration purposes.
- Images are representative and used to illustrate reporting structure only.
- Reporting formats can be tailored to client requirements.
